CORE EXPERTISE

Systems Analysis
Business Analysis
Requirements Analysis
Solution Design
Workflow Design
AI Solutions
UX/UI & Prototyping
Data Analytics

AI SOLUTIONS & SYSTEMS ANALYST**Systems Analysis • Business Analysis • AI Solutions • Digital Products****PROFESSIONAL SUMMARY**

AI solutions and systems analyst with a multidisciplinary background spanning business process, healthcare operations, quality, data analytics, UX, and digital product development. Translates complex operational needs into requirements, workflows, roles and permissions, user journeys, interactive prototypes, data-driven reporting, and AI-enabled processes.

PROFESSIONAL EXPERIENCE**AI Solutions & Systems Analyst****Project-Based Digital & AI Work | 2021-Present**

- Analyzes operational, workflows, user journeys, roles /permissions, approval paths, and interactive solution prototypes.
- Leads analysis and solution design for Al-Ataa ERP, an Arabic-first nonprofit ERP spanning modules, screens, roles, approval workflows, RTL UX, and an integrated interactive prototype progressing toward MVP.
- Designed Nukhba Al-Qudurat as an interactive EdTech product and CP04 as an agentic workflow prototype for structured grant and proposal development.

Translator - Translation**AFHSR | May 2002-Oct 2020**

- Medical translation, Patient Affairs and quality/accreditation contributions, plus medical-records analytics and operational reporting using Excel/VBA.

WORKING METHOD

**Business Need → Requirements → Workflows
→ Roles & Permissions → User Journeys
→ Prototype → Validation → MVP Readiness**

TECHNICAL SKILLS

Requirements Analysis
Functional Requirements
Roles & Permissions
User Journeys
ERP Solution Design
Agentic Workflows
Human-in-the-Loop
Structured State
HTML / CSS / JavaScript
Excel / VBA

SELECTED SECTORS

Nonprofit
Healthcare
Digital Transformation
- SaaS EdTech

SELECTED PROJECTS & EVIDENCE

SELECTED PROJECTS & EVIDENCE

Systems Thinking + Business Understanding
+UX + Data + AI → Practical Digital Solutions

AI-Ataa ERP | Arabic-First Nonprofit ERP
Systems Analysis • ERP • Enterprise UX
• Analysis and solution design for an Arabic-first ERP covering modules, workflows, roles/permissions, user journeys, and RTL UX. Current stage: high-fidelity integrated interactive prototype progressing toward MVP.

CP04 | AI Grant & Proposal Assistant
Agentic Workflow • Validation • HITL
• Eight-stage workflow from intake and funder requirements through validation, drafting, evidence review, and human approval. Built as a deterministic simulation ready for future LLM/API integration.

Healthcare Medical Records Analytics
Excel/VBA • Healthcare Analytics
• Operational analytics for patient flow, daily census, and length-of-stay reporting with recurring reporting and automation. Public presentation uses anonymized or synthetic data.

Nukhba AI-Qudurat
EdTech • UX/UI • Interactive Product
• Arabic interactive learning product with a 30-session plan, verified 600-question bank, interactive tests, results, and a student performance dashboard.

CAPABILITY MODEL

01- Systems Analysis Requirements, workflows, roles, permissions and user journeys.	02- AI Solutions Agentic workflows, validation, structured state and human approval.
03- Digital Product UX/UI, RTL-first design, prototyping and interactive logic.	04- Data & Automation Analytics, Excel/VBA, operational reporting and validation.

TARGET ROLES

Systems Analyst • AI Solutions Analyst • Digital Solutions Analyst • Business Systems Analyst • Solution Analyst • Digital Product Specialist
